## WEST COAST COLLABORATIVE

A public-private partnership to reduce diesel emissions

Dear West Coast Collaborative Partners,

### 1) Upcoming Event

#### [ACT Expo May 1-4 in Long Beach, CA](#)

We've partnered up with ACT Expo, North America's leading clean transportation event, to develop programming that helps serve our mission of reducing vehicular emissions. Now in its 7<sup>th</sup> year, ACT Expo is known for bringing together large end users of clean transportation with technology providers, enabling high volume sales, especially for some of our local firms. This year's ACT Expo will be held May 1-4, 2017 in Long Beach, CA and has more emphasis on electric drive than ever before, including:

- **Dedicated sessions focused on electric drive and alternative fuels across all weight classes** with the nation's leading utilities, fleets and OEMs in advanced clean transportation. Example sessions include:
  - Building the Future: Advanced Transportation Infrastructure (featuring biopropane, renewable natural gas, and heavy duty electric)
  - GameChanger 2.0, which will provide a status and market update on the ultra low NOx heavy duty engine; and
  - Ultra Clean Heavy Duty Vehicle Summit.
  - View the full agenda [here](#).
- **A large show floor featuring alternative fuel vehicles** across all weight classes-from BYD to Daimler Trucks to the GM Bolt. View the show floor [here](#).
- **Offsite tours to see first-hand innovations in advanced clean transportation**, including a special tour of the Honda campus with a reveal and ride and drive of the Clarity FCEV, PHEV and BEV as well as a stop by their top-of-class workplace charging and hydrogen station; tour of the City of Long Beach, which boasts an array of alternative fuel vehicles across all weight classes and fuel offerings, including renewable natural gas, renewable diesel, and plug-in hybrids; and a tour of the Long Beach Container Terminal, the most sophisticated zero emission, battery electric terminal in the US. View tours [here](#).

ACT Expo is an important event to help drive adoption of advanced transportation and its presence in Los Angeles provides a great opportunity for us

to showcase our region's offerings, and we encourage your attendance. Learn more about the show and how to register at [www.actexpo.com](http://www.actexpo.com).

## 2) Funding Opportunities & Informational Resources

Learn about [upcoming funding opportunities and informational resources](#), which include future grant and incentive funds, recent reports and news articles on cleaner vehicles, engines and equipment that is of potential interest to West Coast Collaborative members.

Thank you,  
The West Coast Collaborative Team

### About the [West Coast Collaborative \(WCC\)](#)

The WCC, staffed by the U.S. Environmental Protection Agency's (EPA's) Pacific Southwest Region 9 and Pacific Northwest Region 10 Offices, protects public health by reducing diesel emissions and promoting clean air technologies and practices through public-private partnerships in Western North America. The Collaborative is an ambitious partnership between leaders from federal, state, local and tribal government, the private sector, and environmental groups committed to reducing diesel emissions along the West Coast. Our partners come from all over Western North America, including: California, Oregon, Washington, Alaska, Arizona, Idaho, Nevada, Hawaii, Canada, Mexico, Asian Pacific regions, and Pacific Islands that include the Territory of Guam, the Commonwealth of the Northern Mariana Islands, and the Territory of American Samoa. The Collaborative is focused on creating, supporting and implementing diesel emissions reductions projects by providing technical assistance and funding opportunities.
