

Puget Sound Perspective

Strategic Plan

2014 - 2020

Clean healthy air for
everyone, everywhere,
all the time.

pscleanair.org
Puget Sound Clean Air Agency

*Reducing diesel
emissions, especially in
highly impacted
locations, and reducing
regional GHGs from
transportation*

Strategic Plan's Goals

1. Protect public health and the environment from air pollution
2. Become the most climate-friendly region in the United States
3. Employ the best people, policies, and practices to achieve our work

Objective 1.2

- Reduce transportation emissions, especially diesel particulate, in highly impacted locations

- ✓ Diesel particulate in the air at select highly impacted locations drops 60 percent from 2014 to 2020.

- A. Assess harmful emissions from transportation activities and identify highly impacted locations.

- B. Partner with highly impacted communities to reduce emissions and exposures.

- C. Reduce emissions from maritime activities.
- D. Influence and advocate for policy and regulatory improvements.

Reduce emissions of greenhouse gases from transportation

- ✓ Transportation GHG emissions in 2020 return to 1990 levels.
- ✓ Zero-emission vehicles comprise 10 percent of public and private fleets' new vehicle purchases by 2016.

Strategies Include Working with State Agencies

- With Office of Financial Management, we are analyzing their study of technical and logistical impacts of adopting a **low-carbon fuel standard**.
- With Department of Commerce, we are supporting implementation of state's "**Alt-Fuel Rule**," which requires state and local fleets to adopt biodiesel and electricity to the extent practicable.
 - Assisting with technical information related to adopting biofuels and electricity.
 - Exploring new procurement strategies to purchase biodiesel at the most competitive price.
 - Disseminating best practices for biodiesel handling to ensure performance and quality is maintained.
